

RADEVICI, Ivan, SUSHKEVICH, Konstantin et al. Purification of ZnSe crystals from electrically active background impurities by ytterbium doping. In: *Physica Status Solidi (B)*. 2014, Vol. 251, Issue 8, pp. 1565-1569. ISSN 0370-1972.

Hall coefficient, electrical conductivity, and electron mobility are investigated for n-ZnSe:Yb single crystals with high concentration of electrically active background impurities.
